WatchDogST

Bring your production into the 21st century

WatchDogST moves your production operations into the information age. Utilizing satellite technology and Sentry Technologies' expertise **WatchDogST** keeps key personnel informed about critical production equipment status twenty-four hours a day.

INSTALLATION:

No external power makes **WatchDogST** installation a snap. Place the unit in a clear spot with a good view of the sky and hook up your equipment. Communications are handled by SENTRY and configured before the unit leaves the factory. Plug and play was never this easy.

ALARMS:

WatchDogST employs four dry contact alarms. You have the flexibility to monitor multiple pieces of critical equipment on one location. The notification numbers are programmed by SENTRY to meet your specifications. To change the callout order just call SENTRY and we will make the changes for you. Notify multiple personnel by pager, SMS text message, e-mail, or voice message.

WEB:

WatchDogST utilizes web based reporting. Do you need to know the runtime of specific equipment? Go to your web page and simply copy and paste what you need. View the status of multiple units quickly and easily.

APPLICATIONS:

- Remote compressor on / off
- Salt water disposal on / off
- Flow / No flow
- Tubing and casing pressure high / low
- Field ingress and egress indicator
- Pumping unit on / off
- High / Low tank level
- ESD on / off
- Submersible pump on / off

FEATURES:

- Stand alone operation for any location
- No external power or communication equipment
- Four dry contacts for multiple alarm points
- Web display of alarm status
- Web history of alarms for runtime tracking
- Alarm notification to multiple personnel by pager, SMS text message, e-mail, or voice message
- GPS locator
